

CHANGE IN FILE STATUS
APPROVAL FORM

DATE May 6, 1988,

CURRENT FILE NO. Unassigned

RECOMMENDED FILE NO. SM/047⁹/012

COMPANY AND MINE NAME Ms. Pauline Pugh, Cedarstrom Calcite Mine

REASON FOR CHANGE IN FILE STATUS

The Cedarstrom Calcite Mine is a small, less than five acre, underground calcite operation in Utah county. The mine is located on private land in the NE 4 of Section 31, T6S, R1W. The owner of the mine is:

Mrs. Pauline Pugh
P. O. Box 2
Lehi, Utah 84043

This mine produces about 150 tons of calcite a week which is used for chicken feed. The surface cuts south of the mine are prelaw and are not part of the underground operation.

On January 21, 1988, I asked Ms. Pugh to file a small mine NOI (see attached). This request has never been complied with. I have not pursued this case because the site is old and because Ms. Pugh and the Larson Brothers Limestone Quarry next door are feuding. Larson Brothers have been given a rock aggregate exemption on the condition that they do no drilling and blasting (See file M/047/011). I recommend that the Cedarstrom Calcite Mine be assigned small mine status and the Ms. Pugh be contacted again when the new rules are implemented.
